DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-29, 35, 36, 46, 47, drawn to a special technical feature of a method of sequencing a nucleic acid molecule using a primer, fluorescently labeled polymerase and fluorescently labeled nucleotides.

Group II, claim(s) 30-33, drawn to a special technical feature of a GFP-polymerase attached to a substrate.

Group III, claim(s) 37-43, drawn to a special technical feature of a device for sequencing a nucleic acid, comprising a substrate, a viewing means, a detection means, an electromagnetic radiation source and a decoding means.

- 2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is a method of sequencing DNA, whereas the special technical feature of Group III is a GFP-polymerase, and a special technical feature of Group III is a device for sequencing nucleic acids. The GFP-polymerase is not necessary for the method of Group I, or required for the operation of the device of Group III. Likewise, the device of Group III does not require the GFP-polymerase and is not necessary for the method of Group I. Therefore, Groups I-III lack a single unifying special technical feature.
- 3. This application contains claims directed to more than one species of the generic invention.

These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

species A: claims 11 and 12,

species B: claims 13-16,

Application/Control Number: 10/070,053

Art Unit: 1637

species C: claim 18.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Page 3

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claim 1.

- 4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: in species A the donor is green fluorescent protein, whereas the acceptor is BODIPY, fluorescein, rhodamine green and Oregon green; in species B the donor fluorophore is a luminescent molecule; in species C, the donor molecule is a mutant green fluorescent protein or its derivatives, and the acceptor is tetramethylrhodamine, Lissamine, Texas Red or naphtofluorescein. Therefore, all three species contain donor-acceptor pairs which have different components.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Page 4

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Teresa E Strzelecka whose telephone number is (571) 272-0789. The

examiner can normally be reached on M-F (8:30-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Gary Benzion can be reached on (571) 272-0782. The fax phone number for the organization where

this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR system,

see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system,

contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
